COCOM Document No. 3713.80/1

COORDINATING COMMITTEE

RECORD OF DISCUSSION

ON

ITEM 1380 - CENTRIFUGAL AND AXIAL FLOW COMPRESSORS OR BLOWERS

29th October and 30th November, 1959

Present: Belgium (Luxembourg), Canada, France, Germany, Italy, Japan, Netherlands, United Kingdom, United States.

References: COCOM Documents 3700.2 and .8, 1959 Review W.P.1380/1.

1. The GERMAN Delegation proposed the insertion of "n.e.s." in the first line of the current definition, following "compressors or blowers". They also suggested that at the end reference be made to Atomic Energy Item 30.

2. The COMMITTEE accepted both the proposed changes.

CONCLUSION: The COMMITTEE agreed that the definition of Item 1380 should be changed to read as follows:

"Centrifugal and axial flow compressors or blowers
n.e.s. capable of an overall compression ratio of
2:1 or more coupled with a capacity of over 372,000
cu.ft./min. (10,534 m³/min.) or of an overall
compression ratio of 3:1 or more coupled with a
capacity of over 106,000 cu.ft./min. (3,000 m³/min.).
(See also Item 4380 and A.E. Item 30)."
